

7. In a survey of 400 colleague in a company, 100 were listed as taking apple juice, 150 as taking orange juice and 75 were listed as taking both apple as well as orange juice. Find how many employees were taking neither apple nor orange juice. Also, find the number of employees who were taking only one juice.

8. Differentiate the following with respect to  $x$ :

(i)  $y = \sqrt{\operatorname{cosec}(x^3 + 1)}$

(ii)  $y = (\tan \sqrt{x})^{\sin x}$ .
